City Of Woburn Water Dispenser Woburn Senior Center, 144 School Street

Mass DEP has approved the Woburn Water Department's (Woburn) request to place into service a water bottle filling station that is part of the City's Short-Term Corrective Action Plan to address PFAS6 detected in Woburn's drinking water. The water dispenser is free of charge to **Woburn residents**, providing drinking water that complies with DEP regulations for PFAS 6.

The water-dispensing unit can be used to fill water bottle containers from 1 gallon to 5 gallon. The top shelf in the unit is for filling 1 gallon and 3-gallon containers. To fill your container please open the door and place your container directly under the white dispensing nozzle and depress the on/off button to begin water flow. When your container is almost full, depress the on/off button to cease water flow.

To fill your larger 5-gallon water container, please open the door, lift the hinged top shelf, place your bottle in the dispenser on the bottom shelf directly under the white dispensing nozzle, and depress the on/off button to begin water flow. When your container is almost full, depress the on/off button to cease water flow.

The water dispensing station is maintained by the City of Woburn DPW and will be available for use 7 days a week from 6AM until 8PM water will only be available during these hours. Should you have any questions about this water-dispensing unit or PFAS please call:

Water Department - 781-897-5945
Mayor's Office - 781-897-5901
Woburn DPW - 781-897-5980
